

Rashmi Ranjan Sahoo

Python Developer | Full Stack Web Developer | Django · JavaScript · MySQL
9348698773 | srashmiranjan751@gmail.com | linkedin.com/in/rashmiranjan-sahoo-7b88ab361

PROFESSIONAL SUMMARY

Motivated Python Developer and Full Stack Web Developer with over 1.5 years of internship experience across five organizations, specializing in Python, Django, JavaScript, and MySQL. Demonstrated ability to build and deliver web applications from frontend to backend in fast-paced, remote, and hybrid environments. Currently deepening expertise in Python development at Aicyverse while pursuing a B.Tech in Computer Science at GIET University. Seeking to contribute technical skills and a strong problem-solving mindset to an impactful engineering team.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML5, CSS3

Frameworks & Libraries: Django, Bootstrap, jQuery

Databases: MySQL

Tools & Platforms: Git, GitHub, VS Code

Core Competencies: RESTful Web Development, Version Control, Responsive Design, Debugging

PROJECTS

Medical Insurance Cost Prediction | *Python · Machine Learning · Django · MySQL*

A machine learning web application that predicts medical insurance costs based on user health data and lifestyle factors.

- Built a regression model using Python (scikit-learn) trained on demographic and health features such as age, BMI, smoking status, and region to accurately estimate insurance premiums.
- Developed a Django-based web interface allowing users to input personal health data and receive real-time insurance cost predictions with visual result breakdowns.
- Stored user query history in MySQL and implemented data preprocessing pipelines including feature encoding and normalization to improve model accuracy.

AI-Based Disease Detection with Medicine Suggestion | *Python · Deep Learning · Django · MySQL*

An AI-powered healthcare application that detects potential diseases from user-reported symptoms and suggests appropriate medicines.

- Designed and trained a classification model using Python to analyze patient symptoms and predict probable diseases with confidence scores, improving diagnostic accuracy.
- Integrated a medicine recommendation engine that maps detected diseases to relevant medication suggestions sourced from a structured MySQL database.
- Built a full-stack Django web application with a user-friendly symptom input form, dynamic result display, and patient history tracking for returning users.

SynSpace — Collaborative Code Repository Platform | *Python · Django · JavaScript · MySQL · Git*

A GitHub-inspired collaborative platform for developers to host, manage, and share code repositories with version control integration.

- Engineered core repository features including repository creation, file uploads, commit history tracking, and branch management using Django and MySQL as the backend stack.
- Implemented user authentication, profile management, and access control (public/private repositories) with role-based permissions for collaborators and repository owners.
- Developed a responsive frontend using HTML5, CSS3, Bootstrap, and JavaScript to deliver an intuitive code browsing experience, including syntax-highlighted file previews and contributor activity feeds.

PROFESSIONAL EXPERIENCE

Aicyverse (OPC) Pvt. Ltd.

Sonipat, Haryana, India

Python Developer Intern

May 2026 – Present

- Engineered Python-based assignments and real-world modules under expert mentorship, accelerating proficiency in core programming concepts by completing structured weekly milestones on schedule.
- Applied industry best practices in code quality and documentation, contributing to a hybrid-team codebase that reduced review iterations by adopting standardized coding conventions.
- Strengthened cross-functional collaboration by participating in daily standups and technical sessions, improving task delivery efficiency within an agile team environment.

EduSkills Foundation

Remote

Python Full Stack Developer Intern

January 2026 – March 2026

- Developed full-stack web features using Python, Django, and MySQL across 10 structured weekly sprints, delivering all assigned modules within the program timeline.
- Implemented responsive frontend interfaces using HTML, CSS, Bootstrap, and jQuery, improving UI consistency across project deliverables.
- Managed project source code using Git and GitHub, maintaining clean version histories and enabling seamless collaboration with teammates.

Zaalima Development

Bangalore, Karnataka, India

Web Development Intern

August 2025 – November 2025

- Designed and deployed multiple client-facing web components using HTML5, CSS3, and JavaScript, contributing to 4+ project deliverables over a 4-month engagement.
- Collaborated with a cross-functional development team to integrate frontend modules into production environments, reducing integration lead time by coordinating with backend developers.
- Refined responsive design techniques and browser compatibility practices, ensuring consistent rendering across devices for all assigned web pages.

LumenXo Software Pvt. Ltd.

Baleshwar, Odisha, India

Web Development Intern

January 2025 – March 2025

- Built and launched multiple web projects using HTML5, CSS3, and JavaScript within a structured 3-month internship, gaining hands-on experience across the complete development lifecycle.
- Developed leadership and communication skills through team-based project assignments, contributing to on-time delivery of all intern-assigned project milestones.
- Strengthened core frontend development fundamentals, laying the technical foundation for subsequent advanced internship roles in Python and full-stack development.

EDUCATION

GIET University Gunupur

Gunupur, Odisha, India

Bachelor of Technology, Computer Science and Engineering

August 2023 – May 2027

Saraswati Higher Secondary School

Cuttack, Odisha, India

+2 Science (Physics, Chemistry, Mathematics, IT)

July 2021 – March 2023
