PROFESSIONAL SUMMARY

I am Computer Science and Engineering student at GIET University with hands-on experience in Python development, machine learning, data preprocessing, and full-stack application development. Experienced in building ML-based applications using Scikit-learn and integrating backend services using Flask and MongoDB. Developed projects involving medical insurance cost prediction and EEG-based brain-signal-to-text communication. Interested in developing, evaluating, and deploying practical AI/ML solutions.

TECHNICAL SKILLS

Programming:- Python, JavaScript
Machine Learning:- Scikit-learn, supervised learning, classification, regression, model evaluation
Data Analysis:- NumPy, Pandas, EDA, data cleaning, preprocessing, feature extraction
Deep Learning:- PyTorch, TensorFlow,
Web Development:- Flask, Django, REST APIs, HTML, CSS
Databases:- MongoDB Atlas, MySQL
Tools:- Git, GitHub, VS Code

PROJECTS

Neuro Speak – Brain Signal to Text Communication System | Python · Flask · HTML · CSS · MongoDB · ML · DL GitHub | Live Demo

- Developed a Brain Signal to Text Communication System that converts EEG brain signals into meaningful text using machine learning and deep learning techniques.
- Implemented EEG signal preprocessing, feature extraction, and classification to improve communication efficiency and provide a user-friendly brain-to-text interface.

Toxic Lens – Toxic Comment Detection Platform | Python · Flask · HTML · CSS · MongoDB · ML · NLP GitHub | Live Demo

- Developed a platform to identify toxic or abusive comments using natural language processing and machine learning techniques.
- Implemented text preprocessing and a toxicity classification workflow to analyse user-generated comments.
- Integrated the detection functionality into a web application to display prediction results.

Arogya AI – AI Disease Detection and Telehealth System | Python · Flask · HTML · CSS · MongoDB GitHub | Live Demo

- Developed an ML-based disease prediction system using Random Forest, Multinomial Naive Bayes, and semantic symptom matching, with integrated Ayurvedic, Allopathic, and vitamin recommendations.
- Built patient, doctor, and admin portals with appointment booking, real-time messaging, video consultation, doctor recommendations, and digital Medi Pad prescription generation with PDF export.

TASTETRIAL – Food Delivery Website | HTML · CSS · JavaScript · React JS · MongoDB· Git GitHub | Live Demo

- Developed a full-stack food delivery web application that allows users to browse restaurants, explore menus, place orders, and manage their accounts seamlessly. Implemented secure user authentication and order tracking using Web Sockets.
- Designed a responsive and visually appealing interface to enhance user experience across desktop and mobile devices.

PROFESSIONAL EXPERIENCE

Machine Learning Internship — LearnDepth Academy LLP *August 2026 – September 2026*
Gained practical experience in machine learning using Python, including data preprocessing, exploratory data analysis, model development, training, and performance evaluation. Applied machine learning techniques to analyse datasets, test model performance, and understand the end-to-end machine learning workflow..

Python Developer Internship — Aicyverse (OPC) Pvt. Ltd. *May 2026 – June 2026*
Developed and maintained Python-based applications, focusing on writing clean, efficient, and maintainable code. Collaborated with the development team to implement, test, and debug application features while contributing to backend development, troubleshooting, and improving application functionality.

Web Development Internship — Zaalima Development *Aug 2025 – Nov 2025*
Designed and developed responsive websites using HTML, CSS, and JavaScript. Implemented interactive user interface components, improved website usability and performance, and ensured cross-browser compatibility while following modern web development practices.

Web Development Internship — LumenXo Software Pvt. Ltd. *Jan 2025 – Mar 2025*
Developed and maintained responsive web applications using HTML, CSS, and JavaScript. Implemented interactive website features, enhanced user interface functionality, and optimized website usability and performance to deliver a consistent experience across desktop and mobile devices..

EDUCATION

B.Tech Computer Science & Engineering — GIET University, Gunupur *Aug 2023 – May 2027*

+2 Science (PCM + IT) — Saraswati Higher Secondary School, Cuttack *Jul 2021 – Mar 2023*

+10th — Acharya Pari Mohana Vidya Niketan, Cuttack *Jun 2019 – Mar 2021*
